Vehicle identification

The model overview and the vehicle type designations given with the parts on the catalogue pages help in finding the specific vehicle application. For many items, the exact use depends on the model.

To uniquely identify a part, please contact your EUROPART subsidiary with the complete Vehicle Identification Number (VIN) or use the vehicle part search in our EWOS.

Keine Kompromisse wenn es um Sicherheit geht

BERAL Bremsbeläge sind für den neuen Actros freigegeben

Nach intensiver Entwicklungsarbeit sind BERAL Scheibenbremsbeläge auf Basis der ProTec S[®]-Technologie von Knorr-Bremse für den neuen Actros freigegeben worden. Das Federal-Mogul Forschungs- und Entwicklungs-Team in Bad Camberg hat zwei neue Mischungen entwickelt – je eine für Vorder- und Hinterachse – die hervorragende Werte bei Bremsleistung, Lebensdauer und Fahrkomfort liefern.

Da der neue Actros über eine dynamische Achslastverlagerung verfügt, werden unterschiedliche Bremsmomente an den jeweiligen Achsen benötigt. Für die Vorderachse (Bremsattel Knorr SM7) und für die Hinterachse (Knorr-Bremsattel SL7) bieten die neuen Mischungen

auch eine wirkungsvolle Wärmeableitung. Bremsrubbeln wird verhindert, gleichzeitig werden auch bei hohen Temperaturen sehr gute Bremsleistungen erzielt, d.h. Sicherheit und Komfort profitieren gleichermaßen.

Bezogen auf die Materialabnutzung der Brems Scheibe übertreffen beide Beläge die OE-Anforderungen, sodass auch hier eine längere Lebensdauer erreicht werden kann. Zur Reduzierung des Bremsgeräusches hat der Belag radiale Anschrägungen, die eine bessere Druckverteilung des Belages gewährleisten. Außerdem unterstützen diese Merkmale die Bremsleistung und das Verschleißverhalten maßgeblich.

Echt HELLA. Wie der Name schon sagt.

Originalteile-Qualität und
innovatives Zubehör vom
Marktführer für Beleuchtung.

Entdecken Sie in drei sicherheitsrelevanten Bereichen die LED-Kompetenz von HELLA:

1. Zusatz-Fernscheinwerfer HELLA Luminator LED* mit Positionslicht. Sorgt jede Nacht für eine gute Nacht. Hochleistungs-LED für klares, kaltweißes Fernlicht. LED-Positionslicht in Kartoval®-Optik. Gleichmäßige Lichtverteilung und hervorragende Fahrbahnausleuchtung durch Dreifach-Reflektor. Perfekte Ausleuchtung durch computeroptimierte Feinabstimmung von LED-Leuchtmittel und Frei-Flächentechnik. Schwarzes Aluminium-Gehäuse. Verchromter Glasring. Das Licht für die entspannte, ausgewogene Fahrweise.

* De-minimis förderfähig.

2. LED-Arbeitscheinwerfer Flat Beam*. Extrem flach. Extrem lichtstark. Ideal z. B. für die Führerhausrückwand. Gibt dem Auf- und Absatteln bei Nacht eine völlig neue Sicherheitsdimension. Realisiert mit 11 Watt die gleiche Lichtmenge wie ein H3-Halogencheinwerfer mit 70 Watt.

3. Kennleuchte KL 7000 LED*. Hohe Lebensdauer. Optimales Signalbild bei geringer Leistungsaufnahme. Rundumfunktion ohne bewegliche Teile. Vorhandene Halogen-Versionen können mit der vorhandenen Verkabelung ohne Austausch des Basisgehäuses auf LED umgerüstet werden.

Energiesparende SKF Kegelrollenlager

SKF hat neue Kegelrollenlager entwickelt, die Energieeinsparungen von 30% und mehr ermöglichen. SKF Kunden können mit diesen Lagern ihre Ziele nachhaltig, energieeffizient und profitabel umsetzen.

Energievorräte weltweit begrenzt

Die Energievorräte der Erde sind begrenzt. Daher ist die Senkung des Energieverbrauchs heute eines der vordringlichsten umweltrelevanten Ziele. Dies kann unter anderem durch die Reduzierung von Reibung erreicht werden. Wälzlager haben hier schon immer einen erheblichen Beitrag geleistet. Die neuen, energiesparenden SKF Kegelrollenlager bieten in puncto Reibungsminderung jedoch noch weitaus mehr. Sie wurden speziell darauf ausgelegt, den Energieverbrauch in Wälzgeräten noch weiter zu senken.

Spezifische Produktmerkmale energiesparender Kegelrollenlager:

- Geringeres Gewicht
- Optimierte neue Konstruktion
- PEEK-Käfig auf Wunsch
- Längere Laufbahn
- Spezielle Rollentopographie
- Energiesparende Kegelrollenlager basieren auf dem Standard Kegelrollenlager-sortiment

Vorteile energiesparender Kegelrollenlager

- Reibungsreduzierung um mindestens 30% – und damit geringerer Energieverbrauch der Lager
- Niedrigere Betriebstemperaturen führen zu besseren Schmierungsbedingungen
- Geringere Massenträgheit durch weniger Gewicht; geringeres Risiko von Gleitbewegungen und den damit verbundenen Anschmierungen
- Geringere Reibung ermöglicht erheblich höhere Betriebsdrehzahlen
- Standard-Kegelrollenlager können problemlos durch die neuen, energiesparenden Lager ersetzt werden

Wettbewerbsvorteile:

SKF bietet diese neue Bauart energiesparender Kegelrollenlager als Alternative zu sämtlichen Standard-Kegelrollenlagern an. Die neuen Lager wurden nicht für eine einzige spezielle Anwendung entwickelt. Ihre Außenabmessungen entsprechen der ISO-Norm, wodurch sie Standard-Kegelrollenlager problemlos ersetzen können.

“V^{top} drivers: Roll up!”

EUROPART is already there.

We are “all fired up” and support this initiative:

1. We want to help to improve the social standing of the driver.
2. We want to stimulate the knowledge and sense of responsibility of the driver.
3. We want to optimise understanding of the needs of the driver in all levels of society.
4. We want to join in helping to make road traffic safer and more harmonious for all those involved.

**Reason – Understanding – Example:
The trademarks of the V^{top} drivers.**

An initiative of the long-distance truck driver magazine FERNFAHRER and the lighting specialist Hella.

Wheel Bearing Repair easily!

The vehicle manufacturers Mercedes Benz and Volkswagen offer repair kits for the replacing of the wheel bearing for the Mercedes Benz Sprinter type 906 or Volkswagen Crafter type 2E/2F a complete knuckle with pre-mounted wheel bearing unit.

This repairing method makes an additional axle alignment necessary.

EUROPART offers for these vehicles a wheel bearing repair solution, where the knuckle remains installed in the car:

Order number 6950 668 010 for axle load > 1850 kg and

Order number 6950 668 011 for axle load <1850 kg

The wheel bearing unit is renewed professionally with the help of these special tools:

Order number 9500 004 150 including hydraulic cylinder or

Order number 9500 041 500 without hydraulic cylinder, if it already exists

This is eliminating the need for axle alignment.

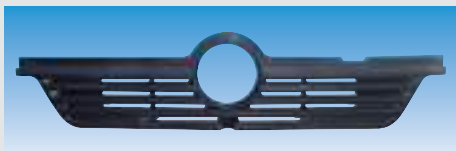

Repair with the vehicle manufacturers method:

1. Vehicle comes into the workshop

Sicherheit

durch Sensoren

JOST

Die sensierte Sattelkupplung

Jetzt im neuen ACTROS

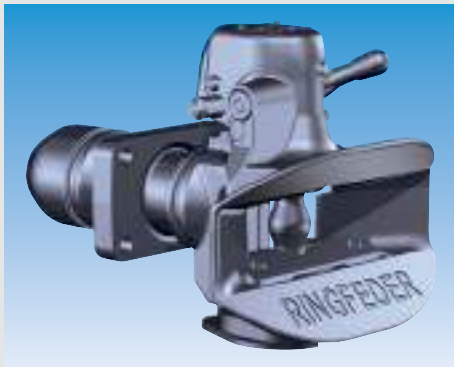

Fahrer-Assistenzsysteme machen die Arbeit einfacher und helfen Unfälle zu vermeiden. So wie die sensierte Sattelkupplung von JOST, die mit drei Sensoren ausgestattet ist.

- Eine Fernanzeige verarbeitet die Signale der Sensoren und zeigt den Verschlusszustand im Fahrerhaus an.
- Zusätzliche Verschlusskontrolle und erhöhte Sicherheit ist durch die optische und akustische Anzeige im Fahrerhaus auch bei schlechten Sichtverhältnissen gewährleistet.

Test case

LE-UN AB03

With the collaboration of various commercial vehicle manufacturers, a testing system for SCR equipment was developed, which is already successfully being used at the manufacturers' training centres and is recommended by them. The AdBlue® testing case offers the facility to perform the necessary mechanical tests on AdBlue® exhaust gas aftertreatment systems.

All the testing components in the case are manufactured from selected high-quality materials to ensure a long service life involving frequent contact with the corrosive AdBlue®. The case is equipped for the Denoxtronic systems I and II.

Mechanical measurements to be performed:

Denoxtronic I

- Quantity measurement at the supply module and at the dosage module

Denoxtronic II

- Quantity measurement at the dosage module
- Visual check of the spray pattern
- Flow rate check of the heating line
- Optional: pressure measurement

Application range

for Denoxtronic I and II AdBlue® systems

Scope of supply

Measuring containers with caps (250 ml and 1 litre), oil testing paper, hook and magnet for mounting, rinsing hose

for Denoxtronic I

- Pressure/metering unit
- Adapter hoses
- Threaded adapter
- 180 Ohm resistance
- Chain for measuring containers

for Denoxtronic II

- Scales for exact measurement of the AdBlue® quantity, calibrating weight
- Adapter hoses and cables
- Bypass line
- Rubber leash and blanking plugs

Order number

9682 202 411

AdBlue® must not contain any mineral oils or greases, nor any silicone oils or greases! Lubricate components: for instance O-rings in the pipe system, threaded fittings at the filter etc. with liquid soap or Vaseline®.

Once having come into contact with AdBlue®, receptacles such as measuring containers, funnels or adapter hoses must then only be used for diagnosis and work on AdBlue® systems.

Test device

for AdBlue®, coolant antifreeze and battery acid

Model RFM 02

The continual reduction of exhaust gas values is presenting ever greater demands on diesel engines. This requires a system of exhaust gas treatment. Here, AdBlue® (32.5 % urea, 67.5 % water) from an additional in-vehicle tank is sprayed in controlled doses into the exhaust flow and effects a chemical reaction in the SCR catalytic converter. Nitrogen oxides are converted to nitrogen and steam. AdBlue® is subject to gradual "decomposition" and only has a limited lifetime (the water content drops through evaporation)! To avoid serious damage or even replacement of all components in the SCR system, and guarantee perfect function, AdBlue® must be tested.

Repair kit for fuel line

Today, PA tubes are the dominant type of line used in the fuel system, from the fuel tank through the fuel filter to the engine. With this repair set, you can repair all kinds of lines, no matter whether they are 8 mm diameter lines for petrol or 10 mm diameter lines for diesel. Transitions between different kinds of materials can be safely set up (PA tube-steel pipe, hose-steel pipe, PA tube-hose). In addition, the set contains all the SAE connectors required on the fuel filter. This repair set can be used to repair all faults on the fuel line quickly and safely.

Diagnosis unit

Axone TRUCK Service

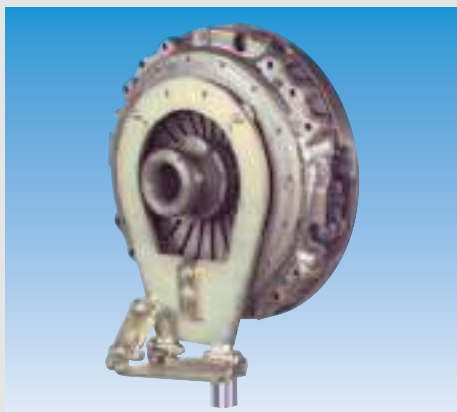

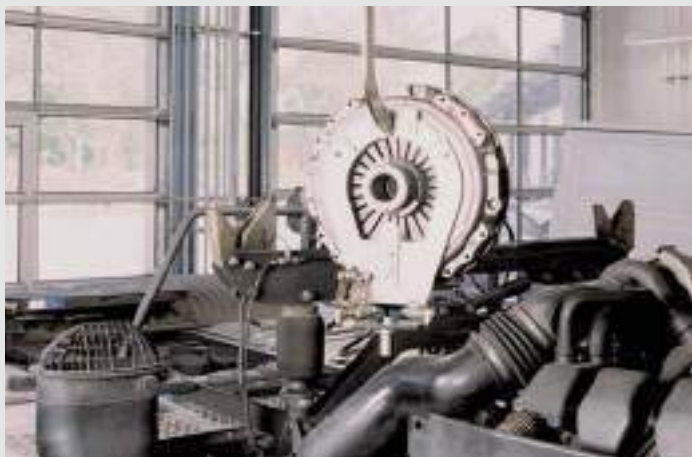

Convenient service unit, specially for the truck or bus company with their own small workshop who would like to perform standard maintenance themselves

- global scanning of all the control units installed in the vehicle with read-out and deletion of the fault codes stored there
- service reset for oil, brake linings and air filter
- clutch initialisation
- coding of injectors
- initialisation of terminal W (generator)
- air suspension level adjustment
- truck OBD scanning tool
- new generation Axone Direct (with new HD electronics) via cable
- SD memory card with special software
- advanced electronics with powerful processor for use on 24 V systems

Scope of supply

SD card with ATS software, OBD cable, kit for external update via PC

Assembly jig

cDISK, Pressure plates

Pressure plate fitting tool for the removal and installation of truck clutches, the pressure plates of which are very difficult to install and remove on account of their high net weight of up to 80 kg, the cDISK makes this task much easier. In combination with existing garage equipment (garage crane, crane, pit or floor lifting trolley), the pressure plate and/or the flywheel can be fitted easily by a single person. The adjustable angle of tilt and ROLLFIT system guarantee optimum working ergonomics.

Scope of supply

Basic tool, fitting arm, transport hoop, exchangeable pins 35, 45 and 55 mm

Order number

9534 004 200

Axle traverse

According to the manufacturer, the new Actros (launched in autumn 2011) and its predecessor models can only be lifted with a two-point system. This applies to both the front and rear axles. Only in the case of on-the-spot breakdown repairs, e.g. on the motorway, may the vehicles be raised at a single point using a movable car lifter at the specified jack points. The carrying plates of the lorry axle traverse can be width-adjusted and height-adjusted at any jack points using spacers.

Height 349 mm

Load capacity 14 t

Adjustment range 370-850 mm

Increased safety during maintenance and repair work

Lifting and supporting made easy!

Protect people and materials – use the position recommendations for lifting and supporting points on the supporting structure!

The vehicle should not be loaded when supported on the supporting structure (vehicle kerb weight).
Attention: Only in exceptional cases – if unloading is not possible – a loaded vehicle can also be supported (see position A-C).

How it is done:

Lifting at position **F**

- at drawbar eyes with overall vehicle weight allowed

Lifting and supporting at position **A – C**

- with overall vehicle weight allowed

Supporting at position **D – E**

- with pressure distribution panel (e.g. wooden panel) with vehicle kerb weight allowed

+++ Safety information +++

Site regulations must always be observed when lifting vehicles.

According to accident prevention regulations, every lifted vehicle must be safely supported!

In the passenger car field the system is called DISTRONIC (DTR) and in the field of trucks and buses distance control speed control (ART)

Radar adjustment jig

suitable for Mercedes-Benz passenger cars, trucks and buses

The distronics, known as DTR in passenger cars and ART (distance control speed control) in trucks, is located in the radar eye on the front of the vehicle. It mainly comprises an aerial with transmitting and receiving unit, the beams of which collect traffic information up to a distance of 150 m in front of the vehicle. It calculates vehicle speed and ideal distance to the vehicle in front during driving, and if this distance becomes too small, the distance control speed control reduces acceleration, when the road is clear, it accelerates again to the set speed.

Using this device and its 3 different centring rings, all the radar heads in distance control systems ever installed at Mercedes either in passenger cars or trucks (e.g. Actros) and buses (EvoBus, Setra) can be adjusted.

Scope of supply

- adjustment equipment with 3 exchangeable centring rings for different vehicle types (passenger cars and trucks)
- laser project for 12 Volt battery with operating display (diode)
- vacuum bell
- spirit level
- helical connection cable with plug for 12 Volt battery (inverse polarity protected)
- catch chain
- adjustment housing with centring nest and self-test jig
- 2 marker sticks for wheel holders
- aluminium storage case

Urea solution

AdBlue®, for reduction of the NOx emission

To keep new emission regulations defined by the EU, diesel vehicles are equipped with SCR technology (selective catalytic reduction). In the SCR process, the high NOx emissions that are produced during optimised combustion in the engine are post-treated in a catalytic converter. The reducing agent AdBlue® is necessary for this process, it is a non-toxic and odourless urea solution, in an exactly defined concentration. AdBlue® is sprayed in an exactly defined dosage through nozzles into the exhaust flow, where it hydrolises and then causes conversion of the nitrogen oxides (NOx) into nitrogen (N) and water (H₂O).
